-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The drawings remain objected to because the hatching in figure 2 is not proper for a plastic material. Applicant is referred to Brown et al for a showing of proper cross-hatching of plastic. Furthermore the drawings do not show the cylindrical shape of claims 12 and new claim 23.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-4, 17, 18 and 23-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Uchida '272.

Uchida clearly teaches a collection vessel 3 with an extender 2 open at both ends and capable of holding the mobile phase flow stream beyond the capacity of the vessel 3, given it's size. In regard to claim 3 note Figure 10.

3. Claims 10-12 and 19-22 rejected under 35 U.S.C. 103(a) as being unpatentable over the reference as applied to claim 1 above, and further in view of Brown et al '418.

To the extent that applicants consider the use of threads as support for the straight sided cylinder claimed, Uchida is considered to be cylindrical in the same manner and Brown et al is further considered to be straight sided. To have made the container of such a shape and a plastic material to hold desired contents would have been obvious in view of such teaching by Brown et al.

4. Applicant's arguments with respect to claims 1-4 and 10-12 have been considered but are moot in view of the new ground(s) of rejection.

Applicants' arguments regarding a generic claim are also considered to be moot given that only one embodiment is claimed. Claim 1 does not encompass the use of a

separate connector means as shown in Figure 4. Claims 5-9 and 13-19 have been canceled.

5. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
